Select between the R185 monthly subscription fee or the R2099 annual subscription fee.

R250 Annual Registration Fee Includes:

- Digital Welcome Pack with valuable information on Play
- Developmental Expectations for each stage of development
- Certificate on completion of each stage
- Milestone Checklists to ensure school readiness and that your child is developing well in all areas

Subscribe to the program and gain access to hundreds of activities and games.

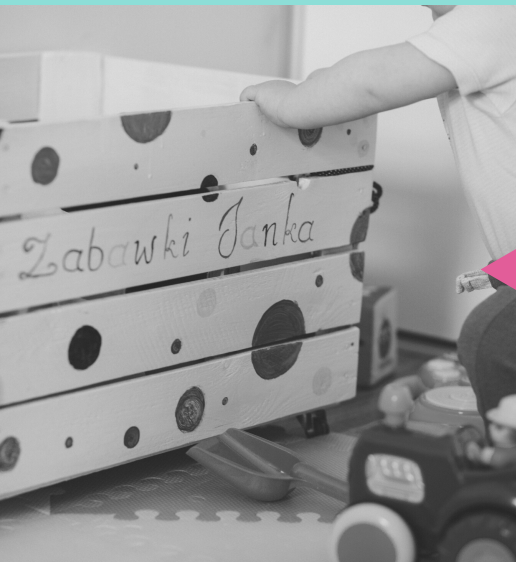

- Monthly membership: no long term commitment and you can cancel at any time!
- Get positive and conscious parenting support from Nanny Knows at any time to have any of your questions answered regarding your child's early development and behaviour.

WHAT OTHER PARENTS ARE SAYING:

"The activities set out in The Building Blocks Program is suitable for everyday life, making it easy to incorporate it into simple activities which equals time well spent. Aquila has grown up so much in the past month. She is trying to speak now. Our favourite is definitely the gross motor activities. She is a busy body so keeping her stimulated is a tedious job but the activities help on the creative side. I was overwhelmed at how fast Aquila grew up. She is now walking and absolutely loves playing the peek-a-boo games. Her vocabulary is improving, she tries to say new words every day."

- Chantelle (Mom)

"I just want to say thank you for all that you do. One super gifted lady! Emiliano is loving all of the activities and it's definitely given us more routine and less guesswork in having him home. Made such a difference! Thank you!"

- Angelique (Mom)

"We are so excited to receive Emiliano's certificate. I'm a super proud mommy. We have absolutely loved every minute of your Building Blocks Program. We have seen Emiliano grow and achieve so many milestones. Thanks to your wonderful program."

- Nicole (Mom)

THE PROGRAM DEVELOPER

Cassandra Treges

Cassandra is the Founder of CAS Families, The Building Blocks Program Developer, and Certified Positive Discipline and Parenting Educator. Whilst working as an Au Pair for 9 years prior, she noticed that many children who were referred to Occupational or Speech Therapy had gaps in their developmental skills, and that children were being sent to school earlier each year, where the focus was more on academics than on a child's development. These gaps in typically developing children could easily have been eliminated by some focused playful activities guided by the parent or caregiver. She obtained her Certificate in Child Psychology and put her skills into practice with her own children as a homeschooling mom. Here is when she realized that if parents knew what types of activities to do with their children to close these gaps in development, many hours and a lot of money could be saved not being spent on avoidable therapy sessions. She made it her mission to help families and children develop to their full potential, and so Building Blocks was born with the aim of building a solid foundation for development from birth to first grade. For any questions relating to the program, child behaviour and child development, please contact Cassandra at:
